Graduate Engineering Opportunities

Exciting graduate opportunities exist to join the Company’s Engineering Team. We are looking for motivated individuals driven by the desire to achieve in a high technology industry. Opportunities exist at our Bankstown site for graduates in the areas of new design and production support research and development.

Our R&D area is currently involved in projects such as Liquid Moulding process, Automated Drilling and Trimming, Pultrusion, Structural Design Optimisation and Reinforce Thermoplastics. Individuals with an interest in these innovative projects, or an interest in Structural Stress Analysis, FEM, CAD Design, Fatigue and Damage Tolerance are encouraged to apply.

Due to the nature of our business and industry requirements, you must be an Australian Citizen or hold Permanent Residency Status.

Hawker de Havilland
Applications should include a CV and copy of your academic transcripts and are to be addressed to Vacation Employment Program or Graduate Program (respectively).

Closing date for applications Friday 7 September 2001

Vacation Student Opportunities

The Vacation Employment Program at Hawker de Havilland requires 3rd or 4th Year Undergraduate Students (with at least a Credit average) from the following disciplines:

• Aerospace Engineering
• Mechanical Engineering
• Mechatronics

Our program commences in December 2001 and concludes at the end of February 2002 with a break over the Christmas period. The program involves working on identified projects that are designed to provide students with practical experience with beneficial outcomes for both the student and company.

Due to the nature of our business and industry requirements, you must be an Australian Citizen or hold Permanent Residency Status.
