

Graduate Mechanical/Chemical Engineer

(CORE89)

Join the Wesfarmers Energy Graduate Engineering Program!

- Extensive industry-based exposure and on-the-job technical guidance;
- Mentoring by senior leaders to support your professional development;
- Leadership, commercial and project management development;

What do we offer our graduates?

As part of the Wesfarmers Energy Graduate Program, you will be on a structured three-year development program, where you will have:

- extensive industry-based exposure and on-the-job technical guidance;
- mentoring by senior leaders to support your professional development;
- leadership, commercial and project management development;
- a graduate buddy to assist your transition into the business; and
- support in achieving your Chartered Professional Engineer Status (CP Eng).

Wesfarmers Energy offers graduate recruits competitive, market-related remuneration and includes performance-based incentives. Also included is superannuation; sick, annual and long-service leave; annual Engineers Australia membership; and costs associated with achieving the Chartered Professional Status.

What are we looking for?

Completion of a Mechanical or Chemical Engineering degree in 2009;

- Completion of 12 weeks Engineering vacation work experience;
- Australian Citizenship or relevant rights to work in Australia on a permanent full-time basis; and
- Eligible for membership with Engineers Australia at Graduate level.

Successful candidates are likely to:

Have outstanding communication and interpersonal skills, have the ability to work effectively individually or as a member of a small team. Be a self starter with good initiative.

We may be part of one of the biggest companies in the country but we are also part of the best, and we aren't looking for the most number of graduates, but we are looking for the best. Sound like you?

Location:

The position available will be with our subsidiary Coregas Pty Ltd, located in Yennora, Sydney, NSW.
