Chevron Australia

Vacation Employment Program

Information Systems

Who We Are

Chevron is one of the world's leading integrated energy companies and was voted the top oil and gas vacation employer in 2014 and top oil and gas graduate employer in 2013 by the National Australian Association of Graduate Employers.

Offering some of the most dynamic career opportunities in the industry, Chevron Australia – headquartered in Perth – leads the development of the Gorgon and Wheatstone natural gas projects, and manages world-class operations and exploration activities.

Chevron offers vacation students the opportunity to gain valuable insight into the culture of the company, and experience the wide range of career opportunities available, whilst gaining invaluable on-the-job experience.

Your Future as a Vacation Student in Information Systems

Chevron Australia's Information Systems (IS) team is a key enabler in the delivery of innovative and reliable applications, information and systems. The team is highly valued by functional project teams for its ability to maximise the benefit of their business processes.

Chevron Australia is inviting information systems students with a keen interest in the oil and gas industry to apply for a 12-week vacation employment placement within our Perth office.

Opportunities exist in our Business and Engineering Solutions, GIS, and Governance and Compliance teams. These placements will see students working on some of Chevron's world class projects.

Who are we looking for?

Applicants should be:

- In their penultimate year of study, or due to complete their studies mid-year 2015 in an information systems or information management, computer science or GIS degree
- Performing at a consistently high academic standard
- Excellent communicators with strong analytical skills and a focus on teamwork
- Committed to Chevron's values of trust, partnership and integrity and achieving an incident and injury free environment
- Available from 1 December 2014 until 20 February 2015

How to Apply

Applications for the vacation program are open from Monday 21 July until 3pm (AWST) Monday 18 August 2014. To find out more information and to apply, please visit chevronaustralia.com

Please note this program is only open to Australian and New Zealand citizens and Australian permanent residents.

Your Future Potential as a Chevron Graduate after the Vacation Program

After having a taste of what it is like to work at Chevron, and following the completion of your degree, we hope you consider a long term career with us. This year's program will see vacation students who perform above expectations being considered for a position on Chevrons' Horizons Graduate Program, where roles are available.

Information Systems Graduates
Within Chevron Australia's IS team you'll gain experience in areas such as business analysis, project management, technical computing, information/data management and application support.

As an IS graduate you could be supporting high performance computing, managing and modelling data solutions, developing secure networks to prevent and detect intrusion, or consulting with function business areas to determine their IS requirements.

You will be given opportunities to stretch your technical knowledge in all aspects of IS, by being involved with the execution of key deliverables to the wider business. Being involved in operational or project assignments you will learn skills outside your profession, which will challenge the way you look at problems by working with cross-functional and diverse teams.

Applications for the graduate development program will open in March 2014. Graduate positions will typically commence in February 2016.
