Employment Opportunities at Boeing Aerostructures Australia

Join the world’s leading Aerospace Company and work on the world’s leading aircraft. In the aerospace industry one name stands out – Boeing – a company that leads technological innovation. Boeing is the world’s leading aerospace company, with almost 160,000 employees all working towards one united goal – making our products the world’s best.

Graduate Engineering Opportunities

Exciting graduate opportunities exist to join the Company’s Engineering Team. We are looking for motivated individuals driven by the desire to achieve in a high technology industry. Opportunities exist at our Port Melbourne site for graduates with the following qualifications:

* Aerospace Engineering
* Manufacturing Engineering
* Mechanical Engineering
* Materials and Process Engineering
* Chemical Engineering

Our Engineering team is currently involved in the structural development of the 787, the world’s most advanced commercial aircraft. We have full design delegation and authority for a range of primary structural components that are manufactured using our own proprietary materials and processes. This is a great opportunity to work on one of the world’s largest engineering projects. International travel along with an attractive remuneration package is on offer to the right graduates.
